

Water Advisory

Last evening the Mayor and Council determined it to be in the public's interest to issue a water advisory for outside use of water throughout the Township of West Milford. This advisory is based upon NJDEP concerns regarding the lack of ground water due to the current high heat and humidity we have been experiencing with forecasts for the same in the near future. This advisory compliments the one issued by the West Milford MUA yesterday, but as noted extends to all water users throughout West Milford. Based upon Chapter 390 Section 3 of the Township Code the following is hereby prohibited until otherwise noted:

- 1) Watering of yards, lawns, gardens and other such vegetation
- 2) Washing of vehicles
- 3) Cleaning of outdoor surfaces
- 4) Cleaning of Buildings
- 5) Cleaning of equipment and machinery
- 6) Operation of ornamental fountains and ponds
- 7) Swimming pools

Your help and assistance in this matter is greatly appreciated. Lastly, take a moment and check on your senior neighbors to assure they are faring well during these oppressive days.
