

CRESCENT PARK
WATER EMERGENCY UPDATE

June 14, 2016

The tank that supplies the water to Crescent Park was at 37 feet at the time of this writing. This is an adequate, normal level. The level is not going up, but more importantly, it is not going down. They will be testing the system tonight when everyone is home. The MUA will leave the system as it is and will be checking the tank hourly for any changes. If they find it receding significantly, they will turn the water trailers back on.

The MUA and their professionals will be meeting at Crescent Park tomorrow morning to review the data and make a determination. They have asked that the township keep the emergency shelter at Hillcrest open until 8:00 pm tonight and tomorrow from 8:00 am until 8:00 pm.
