

CRESCENT PARK
WATER EMERGENCY UPDATE

June 15, 2016

The tank has remained full and the system has been working normally since last night. The logging reports show no sign of leaks.

The water restrictions will remain in effect until further notice. The potable water truck will remain at 50 Morris Avenue until next week when the boil water notice will hopefully be lifted.

The last test was taken today and the results should be available on Monday. These reports are expected to be positive which will result in the lifting of the water restrictions. The MUA will continue to monitor the tanks often until they are comfortable that the problem has been addressed.

The emergency shelter at Hillcrest will be closing after 8:00 pm tonight marking the closing stages of the water issue at Crescent Park.
