Dear Wallisch Homestead Friends, Folk Artists, Halloween Enthusiasts, and Crafters:

WE ARE MAKING SCARECROWS AGAIN AT WALLISCH AND YOU ARE INVITED !!!

ITS OUR 3RD ANNUAL SCARECROW AND GHOST STORIES EVENT ON SATURDAY, OCTOBER 29TH !!!

Bring your home made scarecrow to join the **GIANT CIRCLE OF SCARECROWS**, which will be on display for all to see until Thanksgiving week. Donations of craft materials, old clothes, and masks are welcome as well!

If you prefer to make a scarecrow at the event, we will have everything that is needed there: old clothes, paints, hay, and materials for installation. We also will have volunteers there to assist you if you need help building it.

If you are an artist or crafts person, we would be most obliged for you to join our volunteer team for this creative Folk Art event. Contact Jeff Weinman, Event Chairman at [201-951-1063](tel:201-951-1063) (cell).

After dark, we will invite everyone back to a campfire with ghost stories, hot drinks, and donuts! Ghost Story Tellers also welcome, the more the merrier . Please contact the Event Chairman, Jeff Weinman [201-951-1063](tel:201-951-1063).

PRIZES WILL BE AWARDED FOR FUNNIEST, SCARIEST, AND MOST CREATIVE SCARECROW, AS WELL AS BEST IN SHOW!

For more info, please go to our website event

Friends of Wallisch Homestead is again teaming up with the North Jersey Astronomical Group (NJAG) for their 4th visit to the Homestead.

We are a go for December 3rd at 6 PM, at the Homestead and NJAG members said optimal viewing will be until around 9- 9:30 weather permitting.

The public is encouraged to visit as their members set up their telescopes to view the heavens. Everyone will be able to use these impressive scopes to view the crescent moon, and the planets Venus (which will set fast, but we may be able to see it above the trees in the west early on in the evening), Mars, Uranus, & Neptune.

After moon set (~8PM), the sky will be dark enough to view deep sky objects such as the Great Andromeda galaxy (all night), the Ring and Dumbbell Nebulae (early eve), Globular cluster M 15, Helix Nebula (depending on sky transparency that evening) the Perseus Double cluster, Pleiades star cluster, The Crab Nebula supernova remnant, (after 8:30 pm depending on sky transparency) and finally the Great Orion Nebula rising in the East at the end of the evening.

Students, Teachers, amateur astronomers and the general public are encouraged to attend. The sights will amaze you.

(This is a weather permitting event and cloud cover will cancel the event.)

The **NJAG** is an astronomy club of more than fifty stargazers interested in all aspects of the night sky. Since 1981, the **NJAG** has sponsored many activities for the public in Northern New Jersey, including weekly Telescope Nights and a monthly lecture series in the spring and fall plus special events. Tens of thousands of people have discovered the wonders of the Universe through their telescopes! For information on joining their club please visit <http://njastro.org/agx/>.
