West Milford Department of Public Works

ADOPT A STORM DRAIN CAMPAIGN

West Milford has over 4,000 storm drains/catch basins across the Town.

Almost all of them feed into local streams and lakes.

Keeping them free of leaves, debris and snow/ice, is absolutely crucial.

Clear storm drains reduce road debris and sediments from settling into our lakes and streams.

YOU CAN HELP KEEP WEST MILFORD PRISTINE

- It's simple: just volunteer to keep an eye on a storm drain near your home.
- Always mindful of traffic, clear leaves and debris from the surface of the drain when needed.
- In winter, remove snow and ice from the area around the drain.
- Never attempt to lift a storm grate or enter a catch basin.
- If a storm drain is backing up, notify the West Milford DPW at 973-728-2850.
- There is no sign-up and no paperwork. It is another way of keeping West Milford clean and beautiful.
- Tell your neighbors about the "Adopt a Storm Drain" program, a town-wide campaign for a cleaner environment.
